

# CONSER Use of 042 Codes in Serial Records

## As of May 1, 2009

	Code in 042
<b>New CONSER Standard Record</b>	<b>pcc</b>
<b>New CONSER Minimal Level Record</b>  ➤ <b>IF any</b> headings <b>lack</b> authority control  ➤ <b>IF all</b> headings <b>have</b> authority control <b>or</b> there are no headings that need authority control	<b>msc</b>  <b>pcc</b>
<b>Previously Authenticated Record</b>  ➤ Previously with “ <b>lcd</b> ” in 042  ➤ Previously with “ <b>pcc</b> ” in 042  ➤ Previously with “ <b>msc</b> ” in 042, if <b>any</b> headings still <b>lack</b> authority control  ➤ Previously with “ <b>msc</b> ” in 042, if <b>all</b> headings now <b>have</b> authority control <b>or</b> there are no headings that need authority control  ➤ Previously with “ <b>lccopycat</b> ” in 042, if now <b>verifying description</b> to CONSER standards	<b>lcd</b> (No need to change “lcd” to “pcc”)  <b>pcc</b>  <b>msc</b>  <b>pcc</b>  <b>pcc</b>
<b>Previously Non-Authenticated Record</b>	<b>pcc or msc</b>

### ***042 Codes That Existed Before May 1, 2009***

All 042 authentication codes that were valid before May 1, 2009, including “lcd,” continue to be valid. All may continue to be present in CONSER serial records. All enable CONSER distribution of records. When present, all have the same meanings as before.

### ***Previously Authenticated CONSER Serial Records***

Generally, there is no need to change 042 code “lcd” in a previously authenticated CONSER serial record to “pcc” when you use the record in copy cataloging or modify the record for some other reason.

CONSER catalogers may change 042 code “msc” in a previously authenticated CONSER serial record to “pcc” if all headings in the record now have authority control or if the record includes no headings that need authority control. They may change code “lccopycat” to “pcc” when verifying description according to CONSER standards
